Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 2b

Course content: Health and safety laws:

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 3a

Course content: practical assessment wallpapering:

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 3b

Course content: Action plan :

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built

Year 10

Term 1a

Course content: wallpapering evaluation.

Assessment : Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 1b

Course content: Joinery Assessment:

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 2a

Course content: window frame.

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 2b

Course content: window frame:

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 3a

Course content: Health and Safety requirements. Interpretation of technical information

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 3b

Course content: Interpretation of technical information. Preparation requirements for construction tasks

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course

Year 11

Term 1a

Course content: The Construction industry

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course

Term 1b

Course content: Exploring Carpentry and Joinery principles and Techniques

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course

Term 2a Course content: Exploring Carpentry and Joinery principles and Techniques

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course

Term 2b

Course content: Tiling

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course

Term 3a

Course content: Construction Technology.

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.

Term 3b

Course content: Course completed.

Assessment: Work is assessed using the assessment criteria outlined in the WJEC Constructing the Built Environment course.
